NARROW-PITCH CONNECTORS FOR PC BOARDS

NARROW PITCH (0.5mm) CONNECTORS — P5KF —

2. Unique bellows-type contacts
Our unique bellows-type contacts resist mating stress and offer high contact reliability.

3. Simple locking mechanism is employed which is suitable for FPC connection.

5. Construction resistant to solder lift-off

The construction provides a longer distance between the actual contact areas of the contacts and the pins to yield an improved resistance to solder lift-off.

APPLICATIONS

- Cellular phones
- PHS
- Portable data terminals
- Compact portable devices

Ideal for FPC-to-PCB connections

FEATURES

1. Low profile of 1.5mm
Low profiles of 1.5mm, 2.0mm and 2.5mm are realized. They allow products to be slimmer.

4. Mating length 0.55mm
While achieving a low profile of 1.5mm between PCBs, the effective mating length has been extended to ensure that there is some latitude in the mating.

NOTES

1. Preventing vibration and shock

In order to secure the PC board connection even when a shock applied, please keep a connector away from the influence of the shock by fixing the PC boards to the enclosure or any other means.

2. These models are made very thin so that they may be smaller in size and light in weight than before.

Take care not to give then excessive force when mating them together or unmating them; otherwise, breakage may result.

To prevent damage from incorrect insertions, please confirm the correct position before mating connectors.

3. Keep the PC board warp 0.03 mm or below as against the overall length of the connector.
